技术规格

Background:	This gene encodes a member of the ras superfamily. This gene is imprinted gene with monoallelic expression of the paternal allele which is associated with growth suppression. The encoded protein acts as a tumor suppressor whose function is abrogated in many ovarian and breast cancers. This protein may also play a role autophagy in certain cancer cells by regulating the autophagosome initiation complex.
Applications:	ELISA, WB
Name of antibody:	DIRAS3
Immunogen:	Fusion protein of human DIRAS3
