技术规格

Background:	This gene encodes a component of the interphase centromere complex. The encoded protein is localized to the centromere throughout the cell cycle and is required for bipolar spindle assembly, chromosome segregation and checkpoint signaling during mitosis. Alternatively spliced transcript variants encoding multiple protein isoforms have been observed for this gene.
Applications:	ELISA, IHC
Name of antibody:	CENPO
Immunogen:	Fusion protein of human CENPO
Full name:	centromere protein O

Synonyms :	CENP-O; MCM21R; ICEN-36
SwissProt:	Q9BU64
ELISA Recommended dilution:	1000-2000
IHC positive control:	Human thyroid cancer and Human colon cancer
IHC Recommend dilution:	25-100
