

兔抗 FGF3 多克隆抗体

中文名称：兔抗 FGF3 多克隆抗体

英文名称：Anti-FGF3 rabbit polyclonal antibody

别名：INT2; HBGF-3

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：FGF3

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family. FGF family members possess broad mitogenic and cell survival activities and are involved in a variety of biological processes including embryonic development, cell growth, morphogenesis, tissue repair, tumor growth and invasion. This gene was identified by its similarity with mouse fgf3/int-2, a proto-oncogene activated in virally induced mammary tumors in the mouse. Frequent amplification of this gene has been found in human tumors, which may be important for neoplastic transformation and tumor progression. Studies of the simi

	lar genes in mouse and chicken suggested the role in inner ear formation.
Applications:	ELISA, WB, IHC
Name of antibody:	FGF3
Immunogen:	Synthetic peptide of human FGF3
Full name:	fibroblast growth factor 3
Synonyms:	INT2; HBGF-3
SwissProt:	P11487
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human liver cancer and human esophagus cancer
IHC Recommend dilution:	25-100
WB Predicted band size:	27 kDa
WB Positive control:	Rat liver tissue lysate
WB Recommended dilution:	200-1000
