

兔抗 GPBP1 多克隆抗体

中文名称：兔抗 GPBP1 多克隆抗体

英文名称： Anti-GPBP1 rabbit polyclonal antibody

别名： GC-rich promoter binding protein 1; GPBP; SSH6; VASCULIN

相关类别： 一抗

储存： 冷冻（-20℃）

宿主： Rabbit

抗原： GPBP1

反应种属： Human, Mouse

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

This gene was originally isolated by subtractive hybridization of cDNAs expressed in atherosclerotic plaques with a thrombus, and was found to be expressed only in vascular smooth muscle cells. However, a shorter splice variant was found to be more ubiquitously expressed. This protein is suggested to play a role in the development of atherosclerosis. Studies in mice suggest that it may also function as a GC-rich promoter-specific trans-activating transcription factor. Several alternatively spliced transcript variants encoding different isoforms have been described for this gene.

Applications:	ELISA, IHC
Name of antibody:	GPBP1
Immunogen:	Fusion protein of human GPBP1
Full name:	GC-rich promoter binding protein 1
Synonyms:	GPBP; SSH6; VASCULIN
SwissProt:	Q86WP2
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human tonsil
IHC Recommend dilution:	50-200
