技术规格

Background:	This gene encodes a member of the microtubule-associated serine/threonine protein kinases. The proteins in this family contain a domain that gives the kinase the ability to determine its own scaffold to control the effects of their kinase activities. Alternative splicing results in multiple transcript variants encoding different isoforms.
Applications:	WB, IHC, IF
Name of antibody:	MAST4
Immunogen:	Synthesized peptide derived from internal of human MAST4 .
Full name:	microtubule associated serine/threonine kinase family member 4
Synonyms :	0

SwissProt:	O15021
IHC positive control:	Human testis tissue
IHC Recommend dilution:	50-100
WB Predicted band size:	284 kDa
WB Positive control:	Jurkat cells, COLO cells, Huvec cells and MCF-7 cells lysates
WB Recommended dilution:	500-3000
IF positive control:	COS-7 cells
