

兔抗 GFI1B 多克隆抗体

中文名称：兔抗 GFI1B 多克隆抗体

英文名称：Anti-GFI1B rabbit polyclonal antibody

别名：growth factor independent 1B transcriptional repressor; BDPLT17; ZNF163B

相关类别：一抗

抗原：GFI1B

储存：冷冻（-20℃）

宿主：Rabbit

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

This gene encodes a zinc-finger containing transcriptional regulator that is primarily expressed in cells of hematopoietic lineage. The encoded protein complexes with numerous other transcriptional regulatory proteins including GATA-1, runt-related transcription factor 1 and histone deacetylases to control expression of genes involved in the development and maturation of erythrocytes and megakaryocytes. Mutations in this gene are the cause of the autosomal dominant platelet disorder, platelet-type bleeding disorder-17. Alternate splicing results in multiple transcript variants.

Applications:	ELISA, IHC
Name of antibody:	GFI1B
Immunogen:	Synthetic peptide of human GFI1B
Full name:	growth factor independent 1B transcriptional repressor
Synonyms:	BDPLT17; ZNF163B
SwissProt:	Q5VTD9
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human thyroid cancer
IHC Recommend dilution:	50-300
