

小鼠抗 ZsYellow1 单克隆抗体

中文名称: 小鼠抗 ZsYellow1 单克隆抗体

英文名称: Anti-ZsYellow1 mouse monoclonal antibody

相关类别: 标签抗体

储 存: 冷冻(-20℃) 避光

宿 主: Mouse

抗 原: ZsYellow1

反应种属: ZsYellow1

标 记 物: Unconjugate

克隆类型: mouse monoclonal

技术规格

Background:	ZsYellow1 has a true yellow emission, making it ideal for multicolor applications. Like all of Clontech's Livin g Colors Fluorescent Proteins, ZsYellow1 can be detected in cells without adding cofactors or substrates, which makes it ideal for use in live cell assays. The gene for ZsYellow1 has been human codon-optimized to enhance its translation in mammalian cells, and adapted for higher solubility, brighter emission, and rapid chromophore maturation (8–12 hours).
Applications:	WB
Name of antibody:	ZsYellow1
Immunogen:	This antibody is raised against a recombinant protein and recognizes ZsYellow1.

WB Predicted band size:	26 kDa
	HEK293T cells were transfected with the pCMV6-ENT
WB Positive control:	RY control (Left lane) or pCMV6-ENTRY ZsYellow1 ne)
	cDNA for 48 hrs and lysed
WB Recommended dilution:	1000-5000
