技术规格

Background:	This gene encodes a member of the testis-specific serine/threonine kinase family. The encoded protein is thought to be involved in spermatogenesis via stimulation of the CREB/CRE responsive pathway through phosphorylation of the cAMP responsive element binding protein transcription factor. Alternative splicing results in multiple transcript variants.
Applications:	WB
Name of antibody:	TSSK4
Immunogen:	Synthesized peptide derived from internal of human TSSK4.
Full name:	testis-specific serine kinase 4
Synonyms :	TSK4; TSK-4; TSSK5; STK22E; C14orf20

SwissProt:	Q6SA08
WB Predicted band size:	37 kDa
WB Positive control:	HT-29 cells lysate
WB Recommended dilution:	500-3000
