技术规格

Background:	This locus represents naturally occurring readthrough transcription between the neighboring PTGES3L (prostaglandin E synthase 3 (cytosolic)-like) and AARSD1(alanyl-tRNA synthetase domain containing 1) genes on chromosome 17. The readthrough transcript encodes a fusion protein that shares sequence identity with each individual gene product.
Applications:	ELISA, IHC
Name of antibody:	PTGES3L-AARSD1
Immunogen:	Fusion protein of human PTGES3L-AARSD1
Full name:	PTGES3L-AARSD1 readthrough
SwissProt:	Q9BTE6

IHC positive control:	Human tonsil
IHC Recommend dilution:	25-100
